

*Contemporary blend of measurement  
and process of human dynamics*

Discovery of one's turning points is an event in life. Like threads that stitch the fabric of meaning, your experiences sit well with wholesome integration. We succeed with strengths that help us in a certain situation. Overused strengths can become limitations. The treasure of potential is in the paradoxical constraints we place on ourselves. Identify them to your benefit and develop with assurance into the future. In Leadership Turning Points, the process is about **you**, and not some distant ideal.
